EDUCATION

University

Bachelor's Degree in Computer Science

Expected Graduation: 2026

AWARDS & CERTIFICATIONS

- HTML Essentials – Cisco Networking Academy
- JavaScript Essentials 1 – Cisco Networking Academy
- Network Security Fundamentals
- IT Professional Training Programs
- AI & Machine Learning Workshops

SKILLS

- Technical Skills
- HTML5, CSS3, JavaScript
- Responsive Web Design
- Python
- Git & GitHub

Soft Skills

- Problem Solving
- Analytical Thinking
- Team Collaboration
- Fast Learner

PROFILE

Passionate Front-End Developer with strong background in Artificial Intelligence and Cybersecurity. Experienced in building responsive web applications using HTML, CSS, and JavaScript, and developing AI-powered systems using Python and CNN models. Currently developing "Siggurd" – an AI-based Image Forgery Detection System. Seeking opportunities to build intelligent and impactful digital solutions

PROJECT EXPERIENCE

Siggurd – Image Forgery Detection System

- Built AI model using CNN
- Developed backend with Flask
- Designed modern frontend interface
- Implemented heatmap visualization

Exercise Posture Analysis System

- Used MediaPipe for pose detection
- Built classification model
- Designed upload interface

Gift Printing – E-commerce Website.

- Built responsive frontend using HTML, CSS, JavaScript
- Designed product management interface
- Created categorized product display (12 categories)
- Implemented admin login system
- Developed modern UI for product showcase

Dental Clinic Website

- Designed clean and medical-style UI
- Created appointment booking section
- Developed responsive layout for all devices
- Integrated contact & services sections

RemoFit – Gym Website

Fitness & training website project.

- Designed modern fitness-themed UI
- Created sections for programs, trainers & pricing
- Built responsive layout
- Added interactive elements using JavaScript
